

# ContinuFlow is a cloud-native Workflow and Business Process Automation Platform

ContinuFlow can be customized and configured to digitize and automate any business process in weeks, not months.

## KEY FEATURES

Easy to configure workflow functionality

Cloud-based access

Role based security

Multi-factor authentication

Customizable dashboard

Document/record search and query

Customizable eForms

Export to Excel

Automated aging notifications

Electronic audit trail

ContinuFlow can be easily integrated with corporate systems of record to eliminate double entry and streamline operations across a wide range of back-office functions

### Accounts Payable

- PO and Non-PO Invoice Processing and Approval
- Vendor Master Management (new vendor adds, deletions, changes)
- Capital Spending Planning and Approval

### Purchasing / Supply Chain

- Purchase Requisitioning and Approval
- Contract Management and Administration
- Work Order Management and Tracking

### Human Resources

- New Employee Onboarding
- HR Master Data Administration

### General Accounting
